this universe is the creation of supreme power meant for the benefit of all; individual species must therefore learn to enjoy its benefits by forming a part of the system in close relationship with other species; let not the other species encroach upon the other’s right.

Translated from The Isavasya Upanishad
STP at Cochin International Airport Ltd
In the contemporary times, our human race faces enormous challenges in the sustainability of our current lifestyles and systems. There are a number of critical global environment issues including energy, pollution, transportation, agriculture, land use, construction, water access and use, and ecological destruction. Every day, engineers and scientists make technical decisions which have significant impact on the environment. These decisions can either move us in the direction of sustainability or contribute to the growing problems.
STP at Amrita Institute of Medical Sciences, Kochi
This is how Green Method Engineering provides its facilities. Green Method Engineering (GME) was founded on a shared concern for the eco system. As its promoters had immense expertise in the water industry, working for the environment was only a natural transition. Though GME is a profit oriented venture, it strives to develop methods to sustain the ecosystem. In its essence, GME is an effort to make a tangible and positive environmental impact.

In an effort to provide comprehensive solutions for the environment issues today, GME has formed specialist groups for energy and water conservation, clean development mechanism and design & detailed engineering consultancy for water and waste water treatment systems.
STP at Baby Memorial Hospital Calicut
Our infrastructure helps us to maintain our success by consistently enabling us to respond to the demands of the market. The infrastructure comprises of a good work environment, and a team of talented engineers in disciplines including Civil, Mechanical, Electrical, Instrumentation, Chemical, Biochemical and Biotechnology. This equips GME to progress towards excellence.

THE INFRASTRUCTURE

Environmental Excellence
Moreover, spare parts and user manuals are always available for easy, on-site service. Realising the need for a good service for the clients, GME has a separate service department to attend the maintenance and operational problems of the clients. Through its network of resident engineers, GME has been able to provide such services on short notices.

GME has experts delegated with the responsibility of keeping various projects under strong vigilance to constantly appraise their performance. We have worked closely with numerous customers over the years, supporting a wide range of systems and amassing a wealth of technical knowledge and experience that can provide our clients with the solutions that they need.
ETP at Kerala Khadi & Village Industries, Thrissur
GME has been offering a complete range of water and waste water management solutions using most up-to-date equipment and technologies. We have secured recognition from several industrial sectors through our determined efforts to rise up to client expectations.

As tightening water quality regulations are challenging the limit of conventional treatment systems, we provide cost effective systems and services that help optimise operational efficiencies:

- STP / Grey Water Treatment Systems
- Industrial Effluent Treatment/ Recycling Systems
- Vehicle Wash Recycle Systems
- Membrane Based Treatment Systems
- Thermal Evaporation Systems for RO Reject Concentration and Caustic Recovery
- Energy and Water Conservation Consultancy Services
- Operation and Maintenance Service for ETP & STP
- Design Consultancy for Water & Waste Water Systems
- Environmental Consultancy Services
- Water Treatment Plants & RO Plants
STP with Ultrafiltration System at Mar Sleeva Medicity, Palai

Greenmethod engineering (P) Ltd with its wide ranging experi-
ence in the field of water and waste water treatment has decided
to share its knowledge with the society through the conduct of
various training programs. These programs aim to impart skills in
the field of water. The programs are tailored to prepare resources
as operators, technicians and specialist Engineers for water and
waste water treatment.

As a first step a unique course that opens a promising
career in water and waste water plant operation from
School of Water Technology (SWAT), the center of
excellence in water and waste water treatment, an
initiative by KASE and operated by Green Method
Engineering Pvt.Ltd., the leaders of water and waste
water management.

The aim of this course is to make the candidate a
skilled operator and thus build a great career in this
field and thus contribute towards the safe guarding of
our environment. We have planned a few more
programmes to cater to the education background of
the candidates to be launched in the near future.

- **Eligibility**: Higher Secondary preferably from science
- **Duration**: 4 months (includes 45 hrs of class work &
  105 hrs of onsite practical training and 1 month
  internship at a functioning plant
- **Placement Records**: Placement support in the
domestic & overseas markets
- **Percentage of Placement Assurance**: 60% placements assured after successful completion
